EDUCATION

The University of North Carolina at Chapel Hill

May 2028

Bachelor of Science, Statistics & Analytics Major, Data Science Major | GPA: 4.0/4.0

Chapel Hill, NC

Relevant Coursework: Data Structures and Management, Methods and Models of Data Science

Certifications: CITI Program (Human Research)

Involvement: Carolina Analytics and Data Science, HackNC

EXPERIENCE

Incoming Network and Business Development Intern - *Articul*

March 2026 - Present

- Supports **AI-driven business development** through analyst network building, outreach research, and experimentation on partnership and pipeline workflows.

Research Assistant - *UNC Medical School Boerwinkle Lab*

December 2025 – Present

- Designed a privacy-preserving clinical notes pipeline for epilepsy **cohort analytics**, transforming **350+ notes** across **100+ patients** into analysis-ready JSON/CSV; integrated Epic FHIR retrieval to assemble patient-linked longitudinal histories.
- Implemented validation checks (schema consistency, completeness, deduping) to improve longitudinal dataset reliability; raised validation pass rate by **30%** through prompt iteration and evaluation on **220+** labeled notes.
- Partnered with **3 neurology clinicians** to define requirements and validate outputs, ensuring **stakeholder communication** and alignment throughout delivery.

Management Consultant Intern - *HireBeat Inc.*

August 2025 – November 2025

- Developed **3 client-facing Tableau KPI dashboards** tracking **12 metrics** across **4 workstreams**; reduced reporting turnaround by **20%** and supported consulting recommendations on automation ROI.
- Prototyped an internal RAG-based knowledge tool to accelerate policy/process lookup from **~20 minutes** to **~5 minutes**; summarized findings into **business insights** and exec-ready recommendations for ROI prioritization.
- Synthesized technical findings into decision-oriented guidance for stakeholders, translating root-cause drivers and product constraints into **actionable insights**, business impact, and concrete next steps.

Market Research & Analytics Intern - *Interactive Insights PR Consultancy*

May 2025 – August 2025

- Led **data-driven benchmarking** of **6 global pediatric nutrition brands** for Feihe's Philippines expansion; built a structured feature/pricing dataset adopted by **2 teams** and reduced analysis turnaround from **7 to 4 days**.
- Performed **customer sentiment analysis** of **500+ Amazon reviews** in Python (Pandas); identified **3 key sentiment themes**; created **9 Matplotlib visualizations** embedded in the client-facing deck to support positioning decisions.
- Authored a **4-page** positioning brief translating review insights into **3 messaging pillars** (digestion, taste acceptance, nutrition benefits) with review-backed proof points to support product messaging and differentiation.

PROJECTS

Sports Video Analytics Pipeline | *PyTorch, OpenCV, Ultralytics (YOLO), SAM2, OCR*

January 2026

- Built an end-to-end basketball video analytics pipeline that converts raw game film into structured tracking and event-level tables, enabling KPI reporting (shot quality, defensive efficiency, turnover rate) and ad hoc breakdowns by player, lineup, and possession.
- Processed **18 full games** (40+ hours of video), generated **400+ player tracks** with automated QC checks.
- Improved throughput from **95 min/game** to **28 min/game** via batching, frame skipping, and pipeline profiling.

NCAA Basketball Wins Prediction | *Python, pandas, scikit-learn, NumPy, matplotlib*

September 2025

- Built a supervised learning pipeline to predict NCAA game outcomes using historical team-level data spanning **10 seasons and 365 teams**, performing data quality and exploratory analysis to produce a reusable modeling dataset.
- Engineered features (efficiency margins, rolling averages) and benchmarked models with cross-validation.
- Achieved **68% accuracy / 0.74 AUC vs a 50% baseline**, and summarized drivers using feature importance and error analysis.

SKILLS

Analytics: KPI tracking & reporting, dashboard development, ad hoc analysis, cohort/retention analysis, A/B test analysis, stakeholder communication, data cleaning & ETL, data visualization

Programming: Python (pandas, NumPy, matplotlib), SQL (joins, CTEs, window functions), R (tidyverse, dplyr, ggplot2), JavaScript

BI / Tools: Excel(PivotTables, XLOOKUP), Tableau, Power BI

Frameworks: React, Node.js
